

- We see that both node 1 and node 2 have queues build up in poisson process arrival with rate 200 trans/sec, so queue build up is not always one sided

poisson process arrival of 200 trans/sec in both directions for 30 seconds

poisson process arrival of 300 trans/sec in both directions for 30 seconds

poisson process arrival of 400 trans/sec in both directions for 30 seconds
