

constant rate of 100 transactions/second in both directions

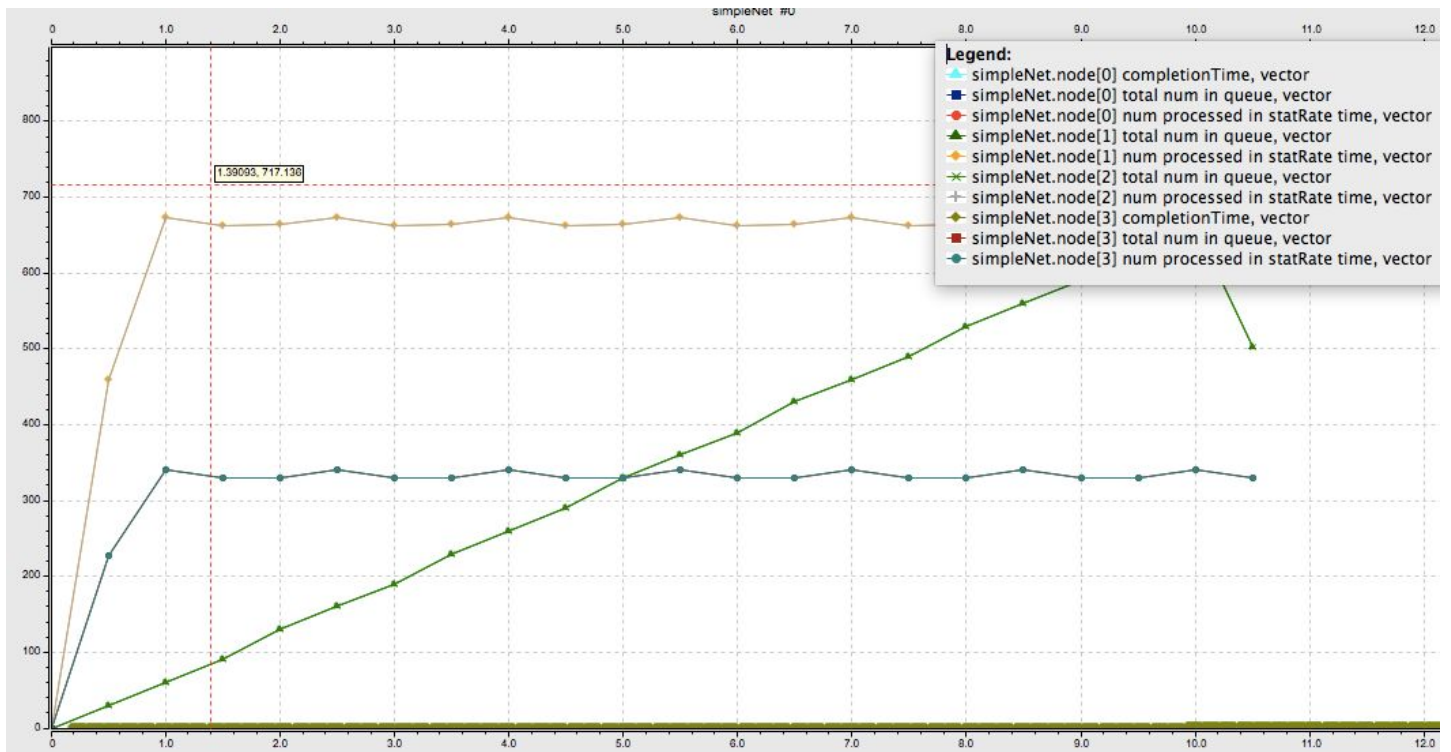

constant rate of 200 transactions/second in both directions

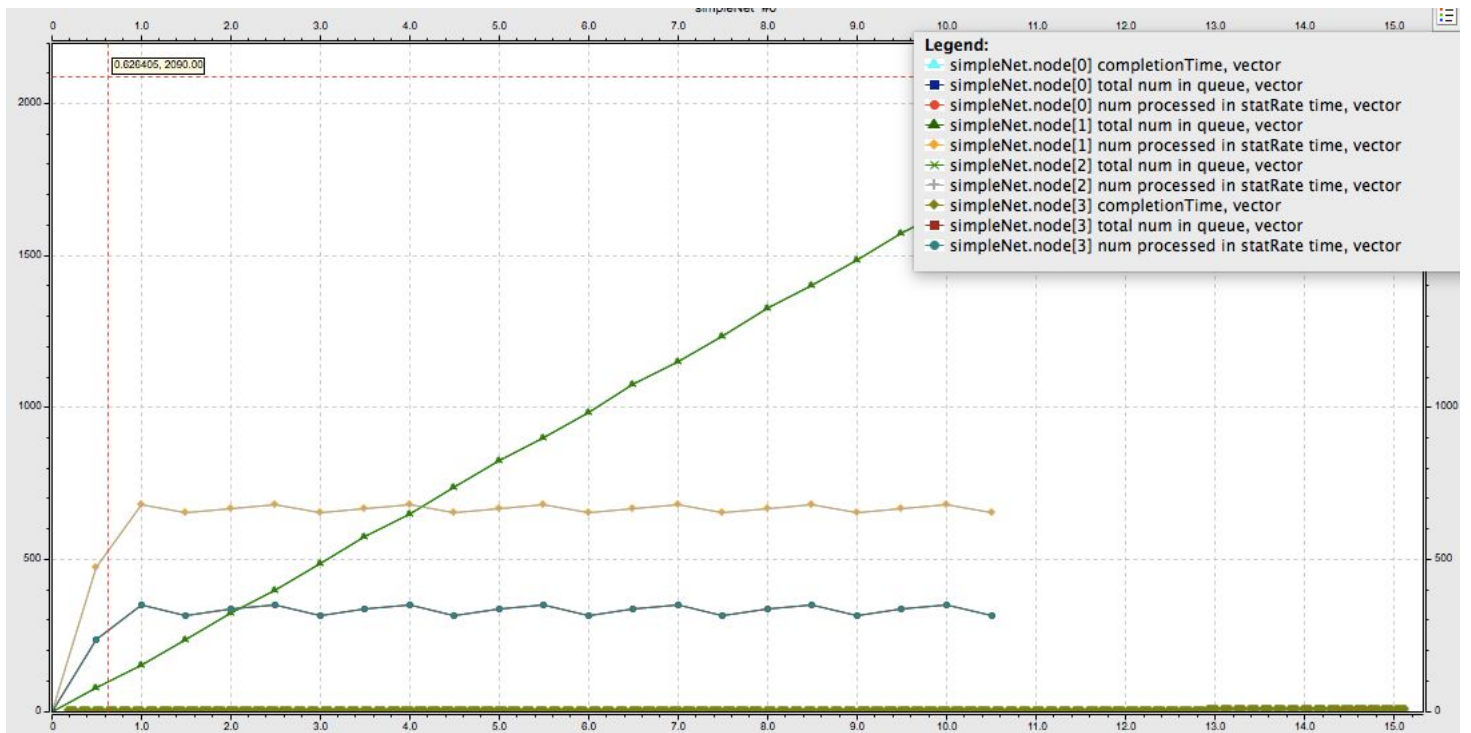

constant rate of 300 transactions/second in both directions

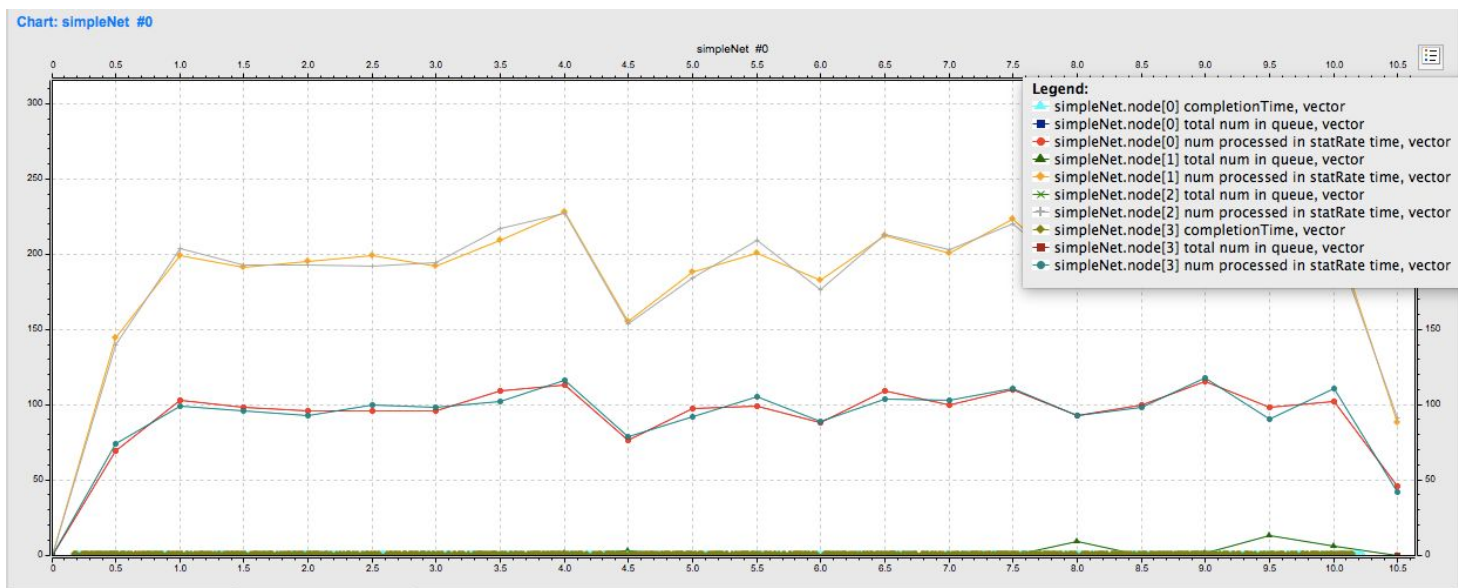

constant rate of 400 transactions/second in both directions

constant rate of 500 transactions/second in both directions

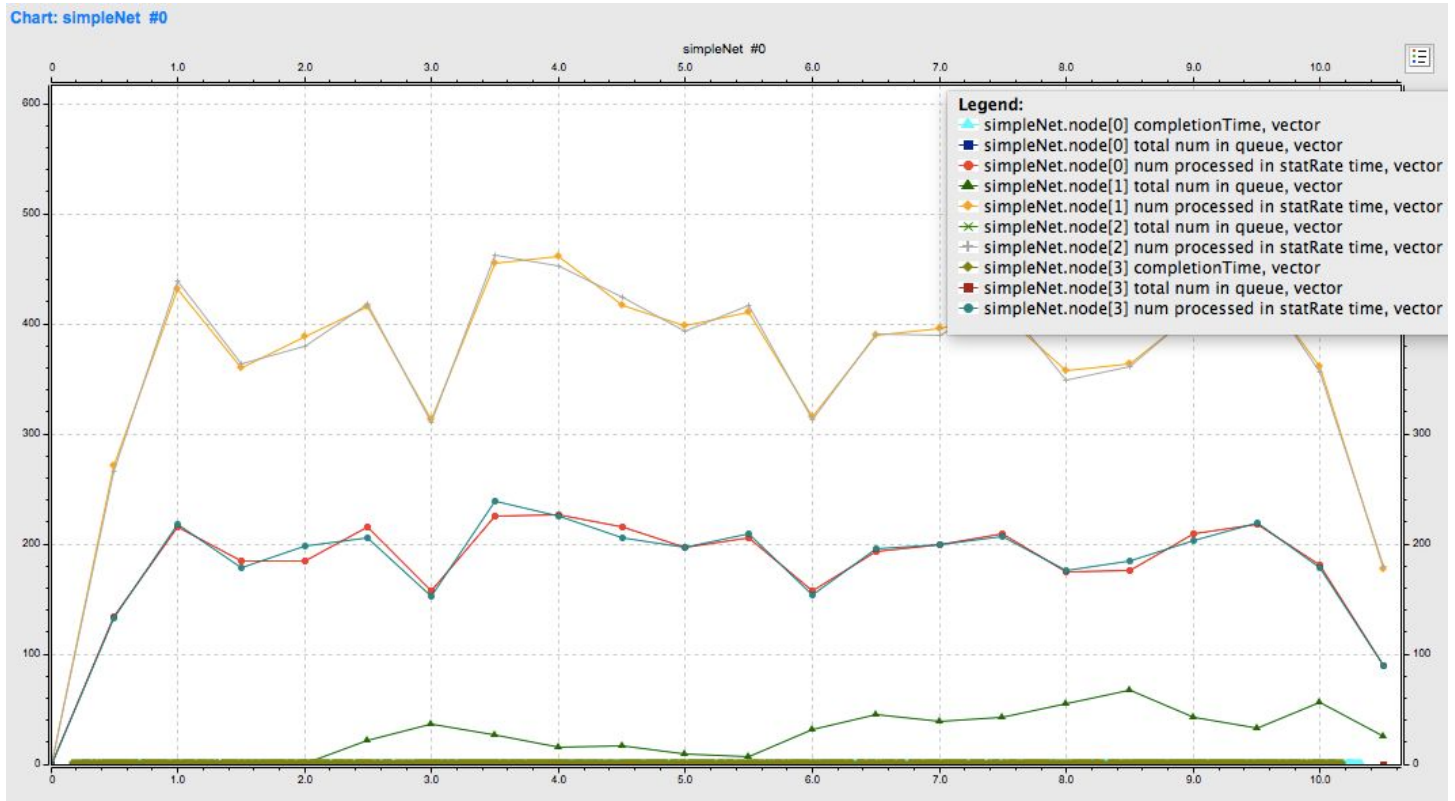

exponential rate of 100 transactions per second in both directions

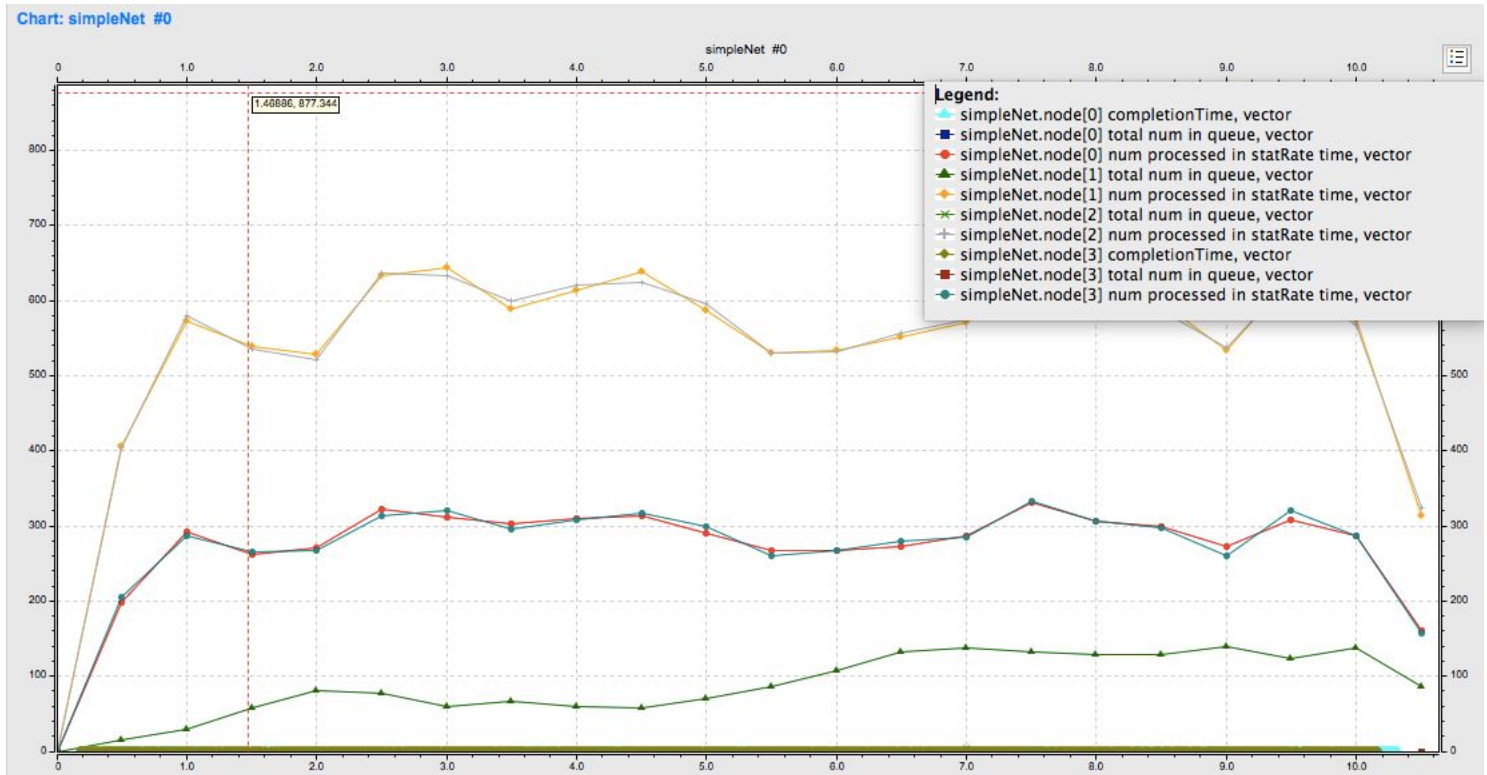

exponential rate of 200 transactions per second in both directions

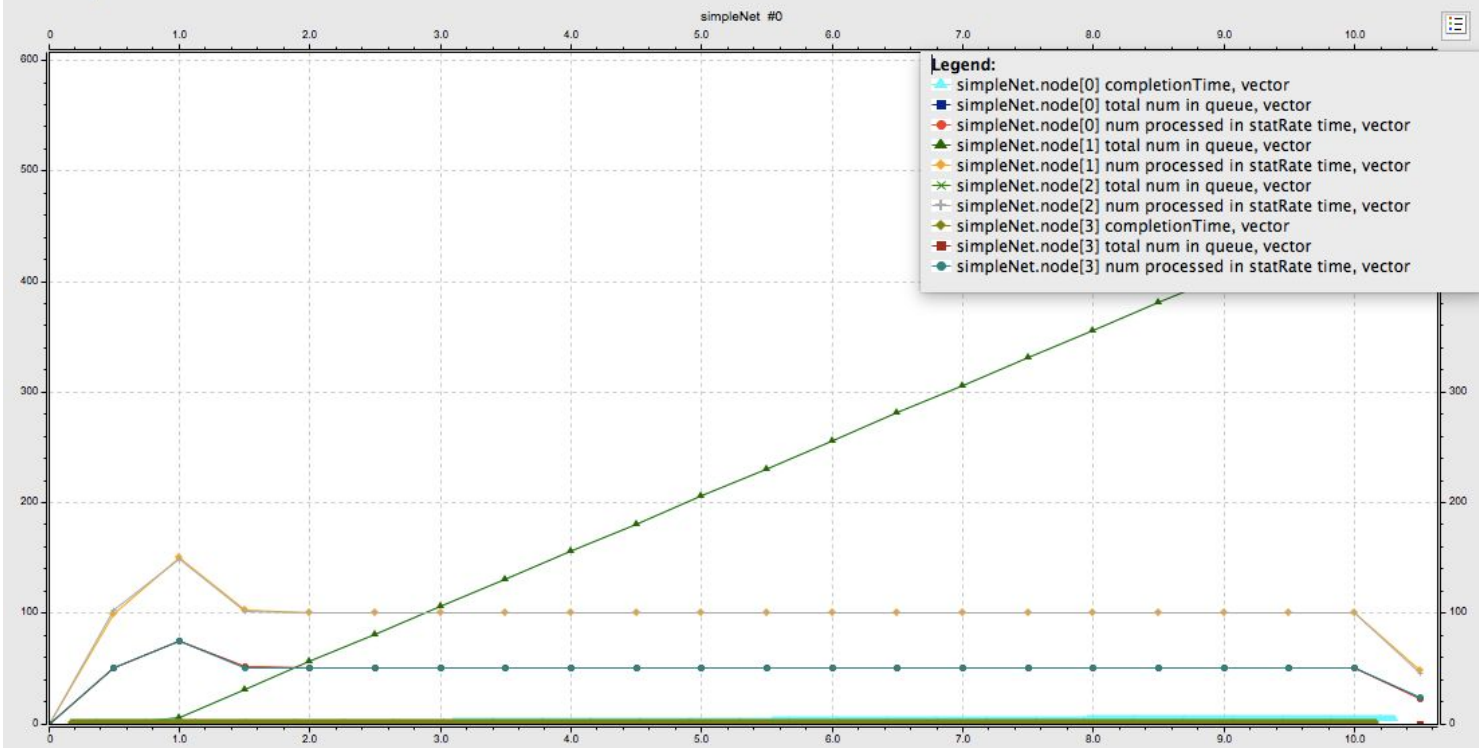

exponential distribution for average rate of 300 transactions per second in both directions

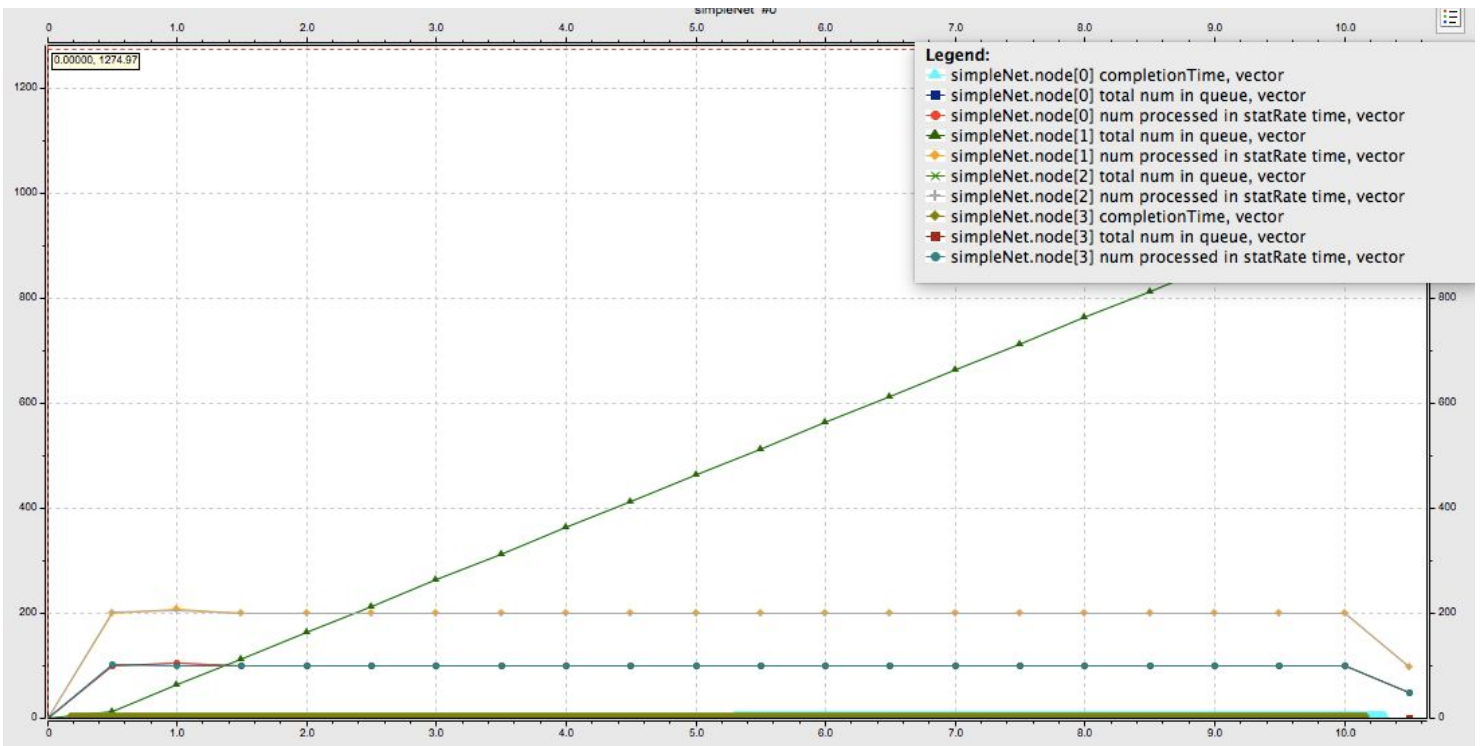

constant rate of 50 transactions/sec in one direction, and 100 transactions/sec in other direction

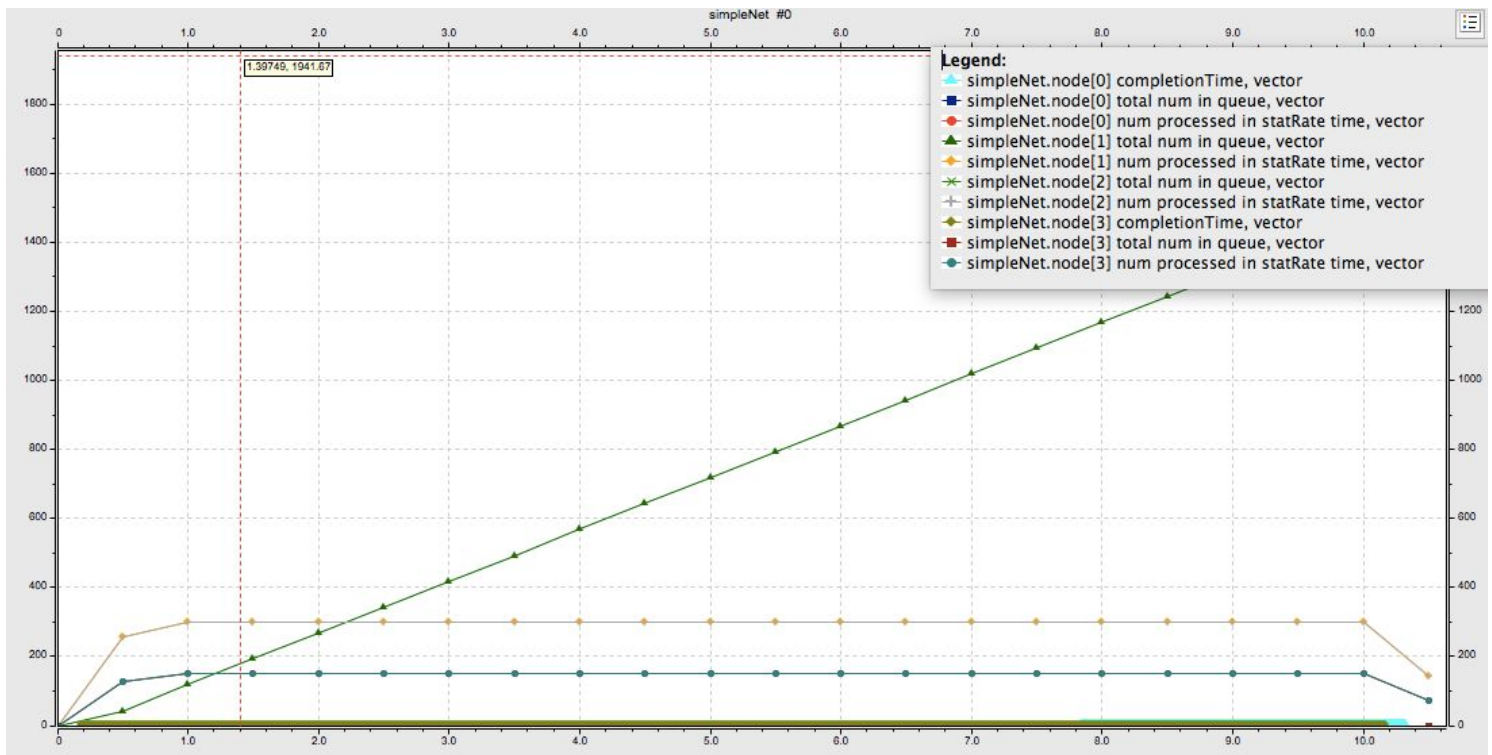

Chart: simpleNet #0

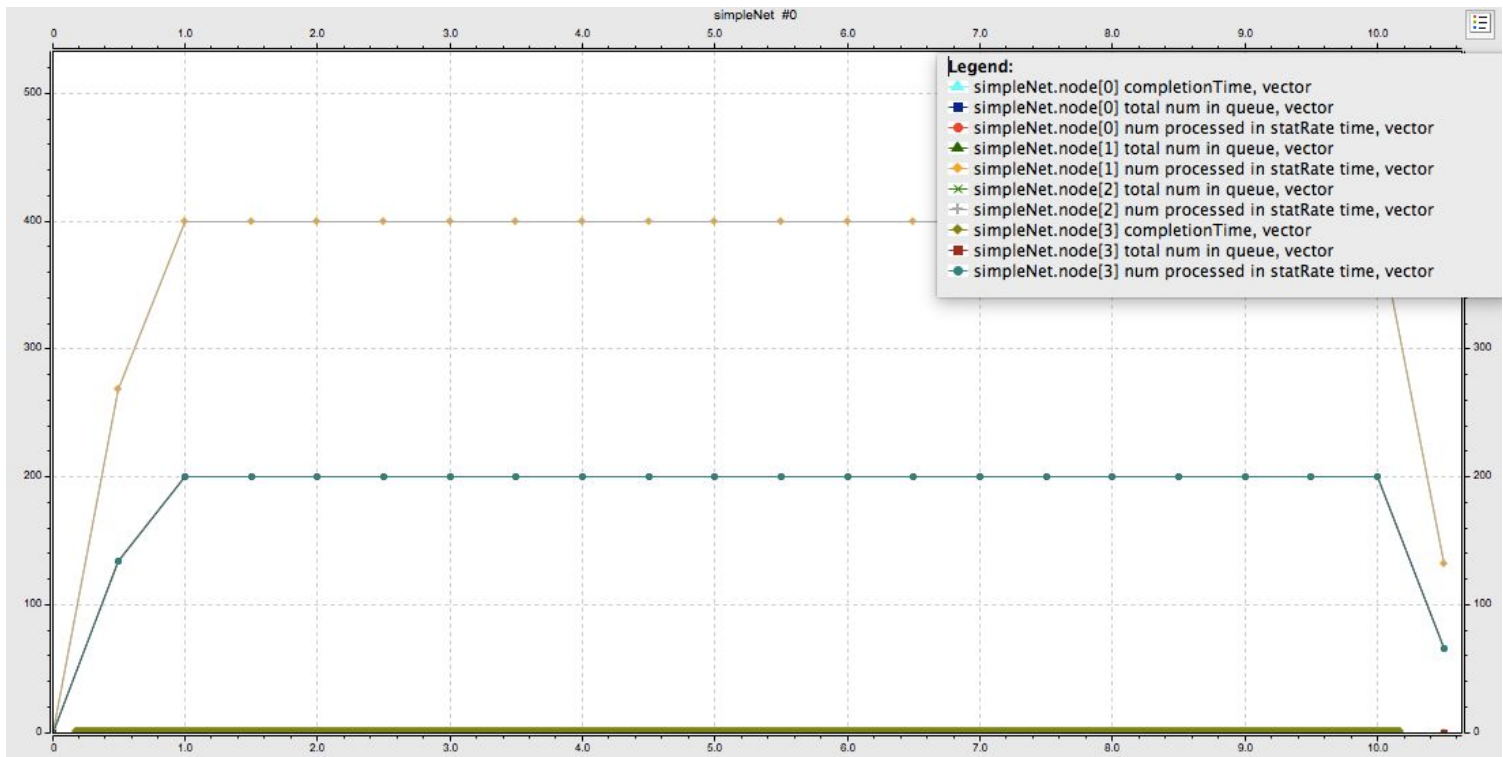

constant rate of 200 transactions/second in one direction, and 100 transactions/second in the other

constant rate of 300 transactions/second in one directions, and 150 transactions/second in the other direction

constant rate of 200 transactions/second with an exponentially distributed transaction size with an average of 1

constant rate of 300 transactions/second with an exponentially distributed transaction size with an average of 1
